

WORLD'S BEST TREASURY AND CASH MANAGEMENT PROVIDERS 2008

NEW YORK, January 15, 2008 – *Global Finance* magazine has released its rankings for the Best Treasury and Cash Management Banks and Providers by category and region to be published in an exclusive survey in the March 2008 issue.

We have selected an overall global winner and, with an increasing number of banks looking to white label solutions from other banks, for the first time this year we have chosen an overall global winner for the Best White Label Service Provider. We have also selected regional winners in North America, Western Europe, Central and Eastern Europe, Asia, Latin America, Middle East, Africa and the Nordic region. Additionally in each region, winning banks have been selected across five categories encompassing payments and collections, liquidity and risk management, CLS-linked bank services and money market funds.

Global Finance editors — with input from industry analysts, corporate executives and technology experts — selected the best providers of treasury and cash-management services. A variety of subjective and objective criteria were used for choosing the winners. Factors considered included: profitability, market share and reach,

customer service, competitive pricing, product innovation and the extent to which treasury and cash management banks have successfully differentiated themselves from their competitors around core treasury and cash management service provision.

Awards submissions we received this year reflected the changing global landscape for treasury and cash management services with increasing competition between regional, domestic and foreign banks, particularly in CEE, Asia and North America. SEPA is also likely to have a major impact on the make-up of truly pan-European banks offering pan-European treasury and cash management services.

In recognition of the growing role of non-bank providers, we have also selected Best Treasury Management Systems & Services providers across 11 categories. "In today's competitive global economic environment, treasurers need the best tools and advice available to make capital work harder than ever," says *Global Finance* publisher Joseph D. Giarraputo. "Our awards identify the banks and providers of products and services that consistently improve transaction processes to speed collections and reduce risks."
